(54) Title: REMOTELY CONTROLLED GATEWAY MANAGEMENT WITH SECURITY

(57) Abstract: A system and method are disclosed for remotely controlled gateway (135) management. The method and apparatus receive a request (120-1, 120-2) for content (164), the request (120-1, 120-2) comprising global addressing information (125-2, 126-2) of a gateway (135) and corresponding to a network appliance 105 on a local network (165) accessible by the gateway (135). The method and apparatus determine gateway configuration information (139, 145, 134) suitable for configuring the gateway (135) to pass one or more content streams 190 comprising portions of the content (164) to the network appliance 105. The method and apparatus communicate the gateway configuration information (139, 145, 134) to the gateway (135).
